

PRESS RELEASE 20.06.2024

INCAS and KTL have signed a Memorandum of Understanding in the field of aerospace testing and certification

INCAS – National Institute for Aerospace Research “Elie Carafoli” and KTL - Korea Testing Laboratory have signed a Memorandum of Understanding for research on aerospace testing and certification and to explore possibilities to work together in this field of expertise.

The MoU was signed at the INCAS headquarters in Bucharest by Mrs. Adriana Ștefan, President and CEO of INCAS and Mr. Jun-Kwang Song, General Director of KTL, on June 19th, 2024.

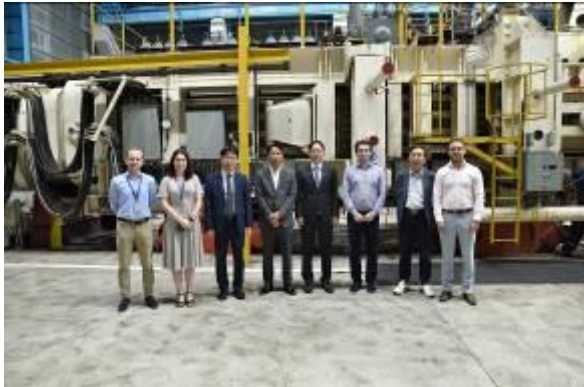

The purpose of the Memorandum of Understanding is to explore a commercial relationship and to seek possible collaborations on subjects such as:

- Research topics related to aerospace testing and qualification and certification of aircraft parts and/or systems;
- Exchange of information on laws and regulation for AAM and Drone Certification;
- Organizing conferences, workshops, seminars and/or events of networking and scientific and technology exchange between the scientists as well as other activities of common interest;
- Investigate opportunities for bi-lateral collaboration on topics of common interest and opportunities of collaboration in the frame of national and international projects or programs;
- Exchange information about scientific publications, conferences, trainings, seminars, aeronautical events and airshows as well as the possibility of personnel exchange or trainings for common interest defined topics.

PRESS RELEASE 20.06.2024

Mrs. Adriana Ștefan, President & CEO of INCAS said: "We were honored to receive our guests and enter into this partnership as well as showcase the INCAS infrastructure and capabilities. This agreement is an important milestone for a fruitful collaboration between INCAS and KTL for the future."

Mr. Jun-Kwang Song, General Director of KTL said: "Through close cooperation between the two institutions, we will contribute to the development of the aviation industry in both countries."

About INCAS:

INCAS – National Institute for Aerospace Research "Elie Carafoli" is the leading research establishment in aerospace sciences in Romania, with a tradition of 75 years in aerospace engineering, flow physics and applied aerodynamics, using state-of-the-art technologies and a unique infrastructure of national strategic importance.

Having been involved in all major national aeronautical projects for civil and military areas, INCAS currently acts as a major player in EU policy making for Research and Development under the FlightPath 2050 vision and the Horizon Europe program.

About KTL:

KTL - Korea Testing Laboratory is Korea's only comprehensive public testing and certification organization. It was founded in 1966 with support from UNESCO as the Korea Fine Instrument Center (FIC).

In addition to its main activity as a testing and certification body, KTL is supporting the fourth industrial revolution through the development of standards and test platforms as well as government-funded research projects to promote key Korean industries.
